

GUN LAW TRENDWATCH

2019 MID-YEAR REVIEW

In 2019, states continue to pass innovative, effective laws while critical federal bills passed by the House remain stalled in the Senate.

For years, a Congress dominated by members beholden to the gun industry has done little to address our nation's gun violence epidemic. During the 2018 midterm elections, fed-up voters elected a gun safety majority to the House of Representatives, which swiftly took action in 2019.

For the first time in a decade, the House of Representatives meaningfully addressed gun violence by passing four critical gun safety bills, including bills to address the

loopholes in our background checks system. Sadly, NRA-backed senators prevented further progress. But the Senate can't prevent this wave of activism from benefiting Americans.

1684
FIREARM BILLS
TRACKED IN 2019

Since the tragedy at Sandy Hook Elementary School in December 2012, 45 states and DC have enacted over 315 gun safety laws. This trend has only intensified since the shooting in Parkland in February 2018—in the past 17 months, 32 states and DC have passed over 110 bills,

including 16 states with Republican governors. In the 2019 state legislative cycle alone, 22 states and DC have signed 47 gun safety bills into law.

This lifesaving progress encompasses states like **Colorado, Hawaii, Nevada, and New York**, which have enacted extreme risk protection orders that facilitate temporarily disarming a dangerous person in crisis. **New Mexico** and **Nevada** passed major legislation to close the private sale loophole and ensure that all gun sales are subject to background checks. Several states, including **New Mexico, Arkansas, Louisiana, Oregon,** and **Washington**, expanded efforts to keep guns out of the hands of domestic abusers.

A number of states invested in violence intervention programs. **California** tripled its annual funding for grants to community-based organizations, from \$9 million to \$30 million. **Illinois** invested \$25 million in a similar program and **Connecticut** allocated \$1 million to Project Longevity, a violence-intervention strategy.

2019 has shown us that courageous legislators are willing to prioritize gun violence prevention, as states respond to voters' demands and lead the steady march towards a safer America.

GUNS IN K–12 SCHOOLS: Failed in 18 states

New Gun Lobby Laws

For years, the gun lobby has opposed evidence-based gun safety laws proven to save lives, focusing instead on turning a profit by putting as many guns in as many places as possible. In recent years, the gun lobby has prioritized arming teachers, despite the fact that eight out of ten teachers oppose this policy. The gun lobby also continues to push dangerous permitless carry and concealed carry policies, at the expense of the safety and wellbeing of the American people.

Despite internal chaos within the NRA, the gun lobby continues to promote reckless policies in state legislatures across the country. In 2019 and beyond, we will keep up the fight against these dangerous policies.
